

# Python Project Team 50 Installation Guide

## Prerequisite

**Python Version:** Python 3 and above

**Recommended IDE:** PyCharm

**Required Dependencies:**

Libraries Used:

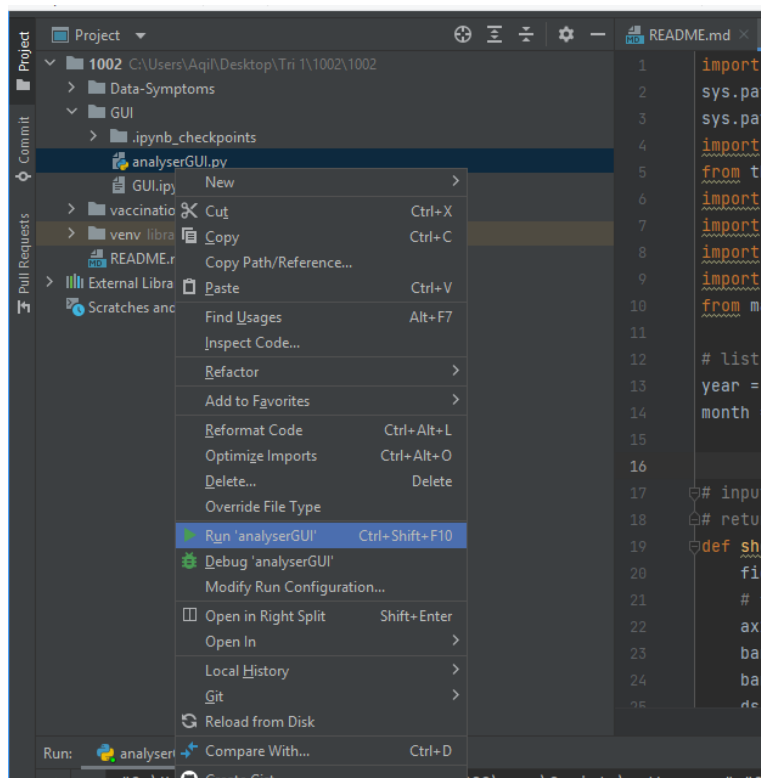

- Pandas
- Matplotlib
- Tkinter
- Pygetwindow
- Pyautogui

## Installing Required Dependencies:

A yellow pop-up will prompt to install the missing dependencies. Click on “Install Requirements” (enable administrative access if required)

## Running the program:

After installing the required dependencies on the left hand side of the project, right click the “analyserGUI.py” and click on run analyzer

Or just navigate to \GUI\ directory using command prompt, run “python anayserGUI.py” in the terminal or just run the script.
